Dear Slava Kim:

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

I am seeing a small right pleural effusion or area near the lung that is filled with liquid. I do wonder if this is a change from the traumatic injury you had when you were younger. Let's plan to follow up with pulmonology.

### Hepatitis C Ab with REFLEX PCR

Result	Value	Ref Range
Hepatitis C Antibody w/Rflx PCR	Nonreactive	NREAC
Hepatitis C Antibody Interpretation		
No evidence of antibody to hepatitis C virus (HCV). Anti-HCV may develop slowly (6 weeks - 6 months) over the course of hepatitis C virus infection. Rarely it may be absent in cases of chronic infection. Anti-HCV may also disappear after recovery from acute, self-limited disease.
